TDS - Temperature Offset Calculation

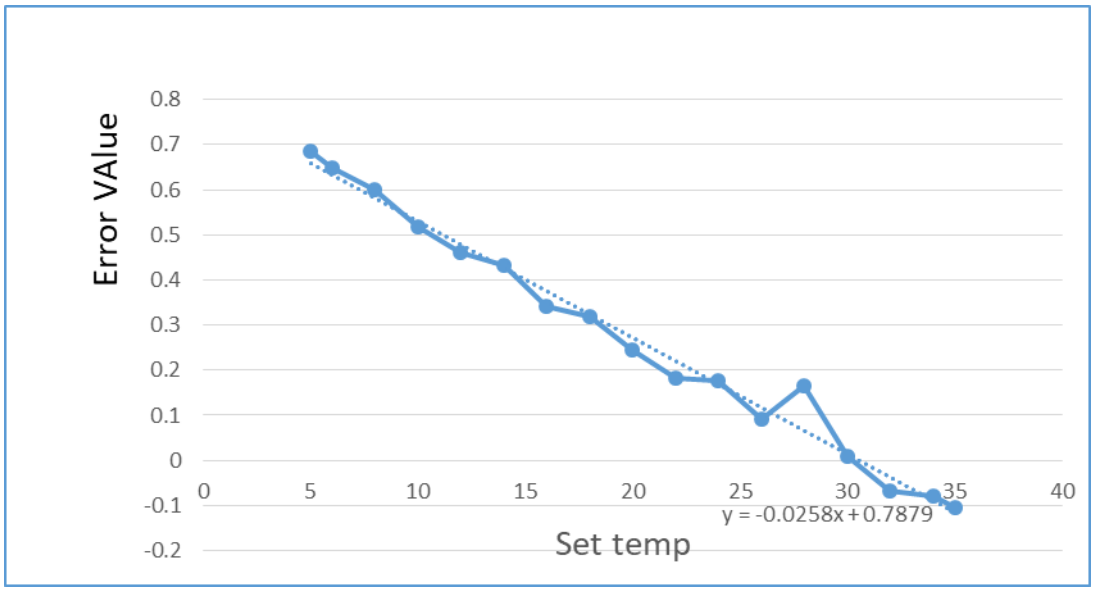
The offset value at specific temperatures has been determined based on the **Error rate versus Set temperature** (Refer file AvgErrorValue.xlsx).

With respect to Linear Equation of **Error rate (Y) Vs Set Temperature (X)**:

Y = (-0.0258(X)) + 0.7879

Y = Avg Error for Set temperature

X = Temperature measured from sensor



Offset Value:

Offset value = (-0.0258 * Raw_temperature) + 0.7879.

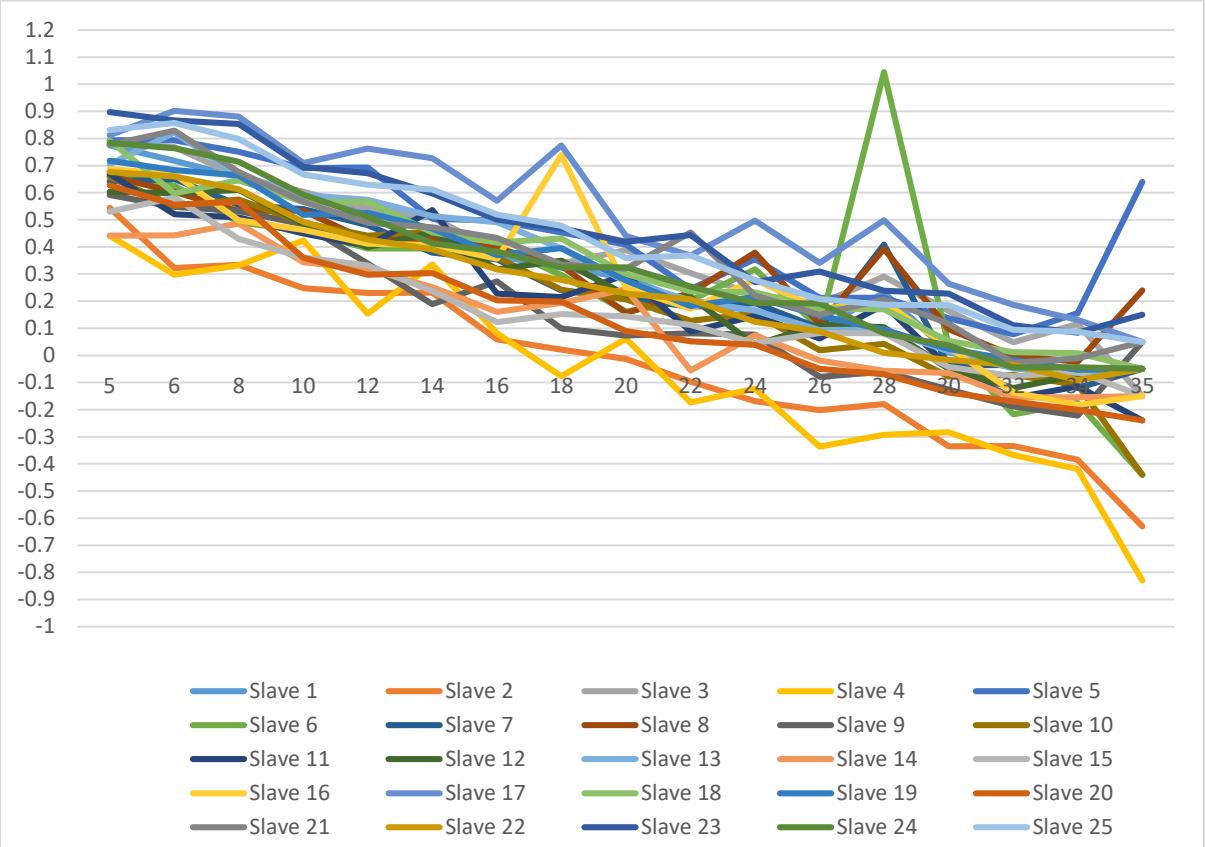
Raw_temperature = Temperature measured from sensor

Calculating Temperature after Calibration:

Calibrated Temperature Value = Raw _temperature – Offset value

= Raw_temperature – (-0.0258 * Raw_temperature + 0.7879)

Temperature Calculation For Each Slaves:



The Offset value at specific Temperatures for each Slaves has been determined based on the **Error rate versus Set temperature** (Refer file *AvgErrorPerSlave.xlsx*)

Offset Linear Equations of each Slaves:

Slave 1 Offset Equation : y = -0.0542x + 0.7984

Slave 2 Offset Equation : y = -0.0607x + 0.5258

Slave 3 Offset Equation : y = -0.0495x + 0.8077

Slave 4 Offset Equation : y = -0.0667x + 0.555

Slave 5 Offset Equation : y = -0.0387x + 0.7965

Slave 6 Offset Equation : y = -0.0476x + 0.7092

Slave 7 Offset Equation : y = -0.0462x + 0.6916

Slave 8 Offset Equation : y = -0.0351x + 0.6391

Slave 9 Offset Equation : y = -0.0488x + 0.5956

Slave 10 Offset Equation : y = -0.0578x + 0.7333

Slave 11 Offset Equation : y = -0.0509x + 0.6789

Slave 12 Offset Equation : y = -0.0487x + 0.6869

Slave 13 Offset Equation : y = -0.0574x + 0.8361

Slave 14 Offset Equation : y = -0.043x + 0.5225

Slave 15 Offset Equation : y = -0.0408x + 0.5369

Slave 16 Offset Equation : y = -0.0512x + 0.7473

Slave 17 Offset Equation : y = -0.0506x + 0.9799

Slave 18 Offset Equation : y = -0.0495x + 0.7756

Slave 19 Offset Equation : y = -0.0516x + 0.7678

Slave 20 Offset Equation : y = -0.0543x + 0.6311

Slave 21 Offset Equation : y = -0.0504x + 0.8102

Slave 22 Offset Equation : y = -0.0503x + 0.7073

Slave 23 Offset Equation : y = -0.0523x + 0.9299

Slave 24 Offset Equation : y = -0.0551x + 0.8156

Slave 25 Offset Equation : y = -0.0535x + 0.9058

Examples:

Y = Calibrated Temperature
X = Raw temperature
For Slave 1:
For x = 10:
y = -0.0542 * 10 + 0.7984
y = -0.542 + 0.7984
y = 0.2564

For x = 20:
y = -0.0542 * 20 + 0.7984
y = -1.084 + 0.7984
y = -0.2856

For Slave 2:
For x = 15:
y = -0.0607 * 15 + 0.5258
y = -0.9105 + 0.5258
y = -0.3847

For x = 25:
y = -0.0607 * 25 + 0.5258
y = -1.5175 + 0.5258
y = -0.9917

For Slave 3:
For x = 5:
y = -0.0495 * 5 + 0.8077
y = -0.2475 + 0.8077
y = 0.5602

For x = 30:
y = -0.0495 * 30 + 0.8077
y = -1.485 + 0.8077
y = -0.6773

For Slave 6:
For x = 8:
y = -0.0476 * 8 + 0.7092
y = -0.3808 + 0.7092
y = 0.3284

For x = 35:
y = -0.0476 * 35 + 0.7092

y = -1.666 + 0.7092
y = -0.9568

For Slave 7:
For x = 12:
y = -0.0462 * 12 + 0.6916
y = -0.5544 + 0.6916
y = 0.1372

For x = 28:
y = -0.0462 * 28 + 0.6916
y = -1.2956 + 0.6916
y = -0.604

For Slave 15:
For x = 3:
y = -0.0408 * 3 + 0.5369
y = -0.1224 + 0.5369
y = 0.4145

For x = 38:
y = -0.0408 * 38 + 0.5369
y = -1.5504 + 0.5369
y = -1.0135

For Slave 16:
For x = 18:
y = -0.0512 * 18 + 0.7473
y = -0.9216 + 0.7473
y = -0.1743

For x = 32:
y = -0.0512 * 32 + 0.7473
y = -1.6384 + 0.7473
y = -0.8911

For Slave 20:
For x = 1:
y = -0.0543 * 1 + 0.6311
y = -0.0543 + 0.6311
y = 0.5768

For x = 40:
y = -0.0543 * 40 + 0.6311
y = -2.172 + 0.6311

y = -1.5409

For Slave 24:
For x = 4:
y = -0.0551 * 4 + 0.8156
y = -0.2204 + 0.8156
y = 0.5952

For x = 39:
y = -0.0551 * 39 + 0.8156
y = -2.1459 + 0.8156
y = -1.3303

For Slave 25:

For x = 6:
y = -0.0535 * 6 + 0.9058
y = -0.321 + 0.9058
y = 0.5848

For x = 36:
y = -0.0535 * 36 + 0.9058
y = -1.926 + 0.9058
y = -1.0202
